

Ozone Generator FAQ's

Q. Where is it made?

A. Surprise surprise these machines are made in China, they lead the world in quality ozone generators, which is in part due to the 2002 SARS virus outbreak.

Q. Can you run it continuously?

A. Yes and no. They can be set to turn on and off at specified times and once set they will turn on and off continuously until stopped. They can be set to turn on from between 10-120 minutes and turn off from between 20-180 minutes. Maximum "On" time not recommended for extended use.

Q. How to use the machine for skin treatment, how do you use the attachment?

A. The TGA prevents us from providing that information you must use your own judgement. Experiment and research.

Q. How to ozonate oils, what oils can you ozonate and how long?

A. Pretty well any oil can be treated with ozone once again you must use your own judgement. Experiment and research. Treatment time is up to the user.

Q. Why do you have to wait 10 mins before you can drink the water when ozone disappears after 10 mins?

A. Waiting 10 minutes is only a recommendation.

Q. How do you ozonate a fridge or car?

A. Run the tube with the stone attached into the fridge, place it in a glass of water if you like, close door lightly (so as not to block tube, and turn the machine on. The time of treatment is up to the user.

Q. Do you leave it running in a room with or without the tube?

A. Ozone is heavier than air so it is best to place it in a high position, it can be treated with or without the tube attached but air is best circulated.

Q. Do you treat the water first after 20mins and then put the fruit and veg in or do you ozonate the water for 20 mins with the fruit and veg in the basin?

A. Cover with water and ozonate for at least 20 minutes for most produce.

Q. How/when do you use the splitter and extender?

A. The splitter is supplied in case you wish to do 2 jobs at once. The extender is to enable you to double the length of the tubing.

Q. Do you have to wait to drink treated water an hour before you eat and an hour after food?

A. It is just purified water you be the judge.

Q. If you use the treated water or oil for your hair will it bleach the hair?

A. Not in my experience, however you must be the judge.

Q. Isn't it best to leave a window open when the machine is in use when you are treating water or oils?

A. If you are going to remain in the room yes if not it doesn't really matter.

Q. There are two stones, one small and black, another - twice as large and white. Which is for what and what's the difference?

A. The only difference is the size and colour both can be used for anything you are treating, just that the smaller stone is used for narrow neck containers.

Q. There are some tiny plastic pipes ("extenders" or something) together with some transparent flexible cone. What are these?

A. The splitter is supplied in case you wish to do 2 jobs at once. The extender is to enable you to double the length of the tubing. The bell shaped attachment is for localised skin treatment.
